

Economy, Business

& Securing skilled workers

We want to make Wildau an even more attractive location for companies and skilled labourers. This includes promoting cooperation between educational institutions and companies. We are also focussing on cooperation between the Technical University of Applied Sciences and city in order to combat the shortage of skilled workers and to further establish Wildau as an international driver of innovation.

Mobility

We know the mobility challenges in Wildau. The current transport infrastructure is often overloaded. That is why we want to introduce a city bus route that is not only reliable, but also environmentally friendly. We also want to create safe routes for all travellers throughout the city.

Participation & Involvement

We want all citizens in Wildau to feel heard and represented. That is why we are committed to transparent information and direct opportunities for participation. We want political decisions to be made jointly and for citizens to be able to actively participate at all times. This is the only way we can ensure that Wildau remains a lively and liveable town for everyone.

Do what counts.

European elections are also on 9 June.
Vote GREEN for a Europe that

- provides protection and security
- protects peace
- renews prosperity
- protects the climate and nature
- promotes animal welfare and organic farming
- defends our democracy against right-wing extremists

local elections on 9 June

for a Wildau
worth living in

DO WHAT COUNTS.

Conserving nature & Protecting the climate

Our environment is close to our hearts. We want to preserve the remaining green spaces at all costs and thus make a contribution to climate protection. This means protecting and expanding green spaces, promoting renewable energies and advocating a sustainable heat supply.

We also want to have a concept developed for Wildau in order to deal with the consequences of climate change in the best possible way and to secure the water supply in the long term.

Youth

Wildau is a good place to live and home to many young people. We want to ensure that our youth does not only grow up here, but that they can really feel at home and develop. That is why we are committed to ensuring that there are enough meeting places where youngsters can socialise and spend time together. Through graffiti walls and workshops, we want to encourage their creativity and at the same time show that we take their interests seriously and create space for their ideas.

Education

Education is the basis for a successful future. That is why we want to expand the educational programmes in Wildau to better meet the needs of our children and young people. This includes the rapid expansion of our primary school and the introduction of an upper secondary school. We also want to strengthen cooperation between schools, the university and companies to ensure that our children have the best opportunities on the labour market.

WE ARE APPROACHABLE AND LISTENING.

Petra Weyers

Teacher. / 63 years old

Focus areas: Climate, environment and nature conservation & education

"I want my grandchildren to have a good future too. We want to set the course for this now. If we make a contribution to climate protection within our town of Wildau, we will secure the liveable, equal opportunities Wildau of tomorrow."

Simon Devos

University lecturer / 32 years old

Focus areas: Education, Business & International topics

"Since I came to Wildau as an exchange student from Belgium in 2012, the city and the university have developed a lot. Together, I would like to further develop Wildau as a centre of education and innovation. Wildau's companies will also benefit from this."

Anne-Katrin Krause

Children's nurse / 60 years old

Focus areas: Mobility, Social Affairs & Nature conservation

"Wildau is losing its charm due to increasing traffic and urbanisation. I would like to work towards reducing through traffic, strengthening public transport and preserving the remaining green spaces. It is also of fundamental importance to me that people in our town live together openly."

Lukas Matthies

Industrial clerk / 22 years old

Focus areas: Youth, Society & Digitalisation

"I am very concerned about the increasing division in society, with populism and misinformation encroaching on many families and friendships. I have learnt to confront this and come to a common denominator with people who hold very different opinions. I would like to use this ability to restore trust in politics."
